

# foodieLand

## Project Discription

We'd like to build a network of community application called 'foodieLand' where people can dive into their favorite restaurants. Registered users submit content to the site such as links, text posts, images and video, which are allowed user implement CRUD operations on it. The collections in the database would be based on the length from the user's current location and the numeric ranking of the chosen restaurant

## User Personas

Michael Kelso  
"new resident"

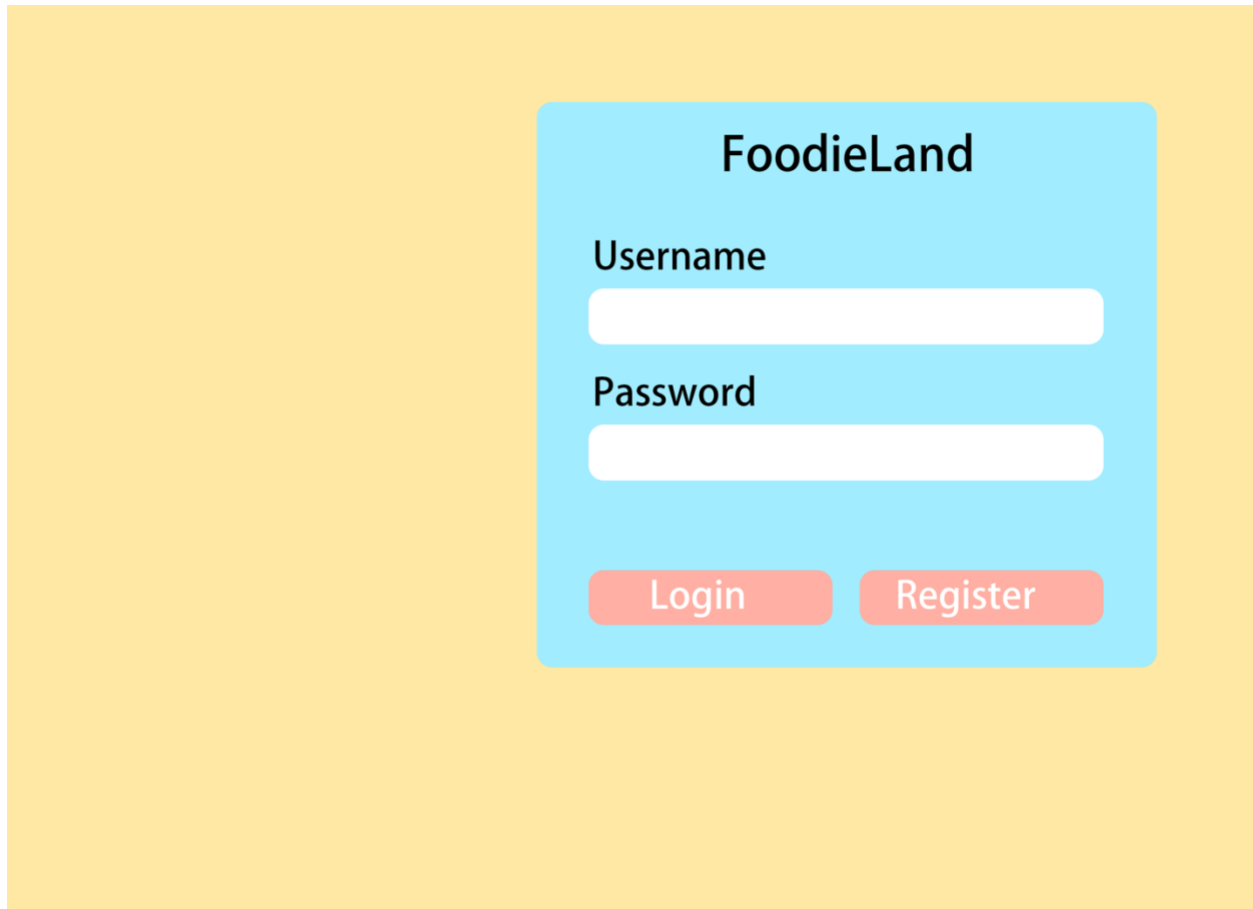

as a new resident of the Bay Area who'd like to give it a shot for different sorts of food since he has been living in the "flyover" state for his entire high-school life, which did not give him so many food choices, he's seeking an app where he can post pics and write reviews for the restaurants he's been visited

Jeffrey Dahmer  
"gourmet influencer"

as a gourmet influencer, who travels all around the united states do the food reviews and let people know where to go to not waste of your money, Since he has gotten a lot of followers on YouTube, he needs an app where can help him to write reviews for the good restaurants with ranking star and links connect to his specified food evaluation YouTube videos.

start at Login Page

A login and registration form for 'FoodieLand' is centered on a yellow background. The form is a light blue rounded rectangle. At the top, the title 'FoodieLand' is displayed in bold black text. Below the title, the label 'Username' is followed by a white text input field. Underneath, the label 'Password' is followed by another white text input field. At the bottom of the form, there are two red rounded buttons: 'Login' on the left and 'Register' on the right, both with white text.
